Professional Experience

Green Dim is a founding member and Managing Director at BSD Advisors LLC. He is a senior banking veteran with 30 years of commercial banking experience. His banking career is quite diverse and includes international banking, commercial lending, credit policy and administration, project financing, and problem loan management and workout. Green left banking to become a Partner at BSD Advisors in 2012 after various leadership roles in banking which included prior positions as Senior Vice President in the special assets department of Huntington National Bank in Columbus, Ohio, First Vice President and Team Leader in the Special Assets Department of Mellon Bank Corporation in Philadelphia (now BNY Mellon), and Vice President and senior workout professional in the Philadelphia, Pennsylvania offices of RBS Citizens, a subsidiary of the Royal Bank of Scotland.

Green's workout experiences date back to the Mexican Debt Crisis and the LDC Debt Restructure in the 80s and 90s which led the former Mellon Bank Corporation (Pittsburgh) to form and utilize the first ever "good bank – bad bank" strategy to manage its ballooning classified loans.

Green's professional background includes underwriting, structuring, and lending experiences in C & I and real estate loans to customers in business banking, middle market, corporate, and international banking. His industry experiences include retailers, wholesalers, manufacturers, service industries, technology, apparel, healthcare, nursing homes, churches, auto parts manufacturers and suppliers, home improvement and building products companies, food processing, restaurants, heavy equipment manufacturing, equipment lessors, transportation, poultry farmers, real estate developers, gas station operators, oil and gas, utilities, etc.

Green has extensive knowledge of bank products and services (cash management, foreign exchange, interest rate swaps, lockbox, concentration of funds, and check presentment advisory services, etc.), as well as knowledge of other specialized lending products (real estate, asset based lending, trade financing products (import-export letters of credit), project financing, oil and gas lending, etc.). Green's vast experiences in banking, workout, restructuring, reorganization, and bankruptcy uniquely prepare him to lead and facilitate negotiations between borrowers and creditors, particularly in situations that involve loan defaults and debt restructuring. Green was a Certified Lender and a Certified Credit Professional at Mellon Bank Corporation where he held a Loan/Credit Approval Authority of \$10,000,000.
